Appointment of Field Service Engineer in Cincinnati, Ohio adds to AMI's Expertise and Service Area

CINCINNATI, OHIO (November 12, 2007) - Automated Machinery, Inc. (AMI) is pleased to announce the appointment of Ryan Morgan as a field service engineer based in Cincinnati, Ohio.

Morgan brings a variety of expertise to AMI, including working on brake presses, shears, feeders and roll formers.

"The addition of Ryan to our team of experienced service engineers is part of AMI's ongoing strategy to lead the industry with technical competence for specific equipment types," notes Mark Sackett, president of AMI. "We continually seek to hire experienced, career field engineers who complement this strategy. The addition of an experienced field engineer in Southern Ohio will uniquely position AMI to provide cost-effective repairs and maintenance in that region and beyond."

Operating out of Cincinnati, Ohio, Morgan will service a variety of CNC sheet metal fabricating machines and represent AMI throughout the region.

Automated Machinery, Inc. (AMI), founded in 1982, is a leading independent provider of service, parts, retrofits and maintenance programs for turret punch presses, press brakes and other CNC sheet metal forming equipment. AMI's experienced service team provides expert technical support and services, as well as a comprehensive inventory of new, discontinued and reconditioned replacement parts for a variety of turret punch press and press brake brands and other CNC fabricating machines.
