CINCINNATI, OHIO (March 26, 2008) - Automated Machinery, Inc. (AMI) is pleased to announce the appointment of Chris Patulski as a field service engineer based in Hamilton, Ohio.

Patulski brings more than 13 years experience in the sheet metal fabrication and machinery field to AMI previously working as both a field engineer and support technician at Salvagnini America Inc.

"The addition of Chris to our team of experienced field service engineers is part of AMI's ongoing strategy to lead the industry with technical competence for specific equipment types," notes Mark Sackett, president of AMI. "We will continue to hire experienced, career field engineers, who complement this strategy. The addition Chris Patulski will expand upon the services we already provide for Salvagnini equipment, and continue to broaden the repairs and maintenance we provide for all AMI customers."

Operating out of Ohio, Patulski will service a wide variety of CNC sheet metal fabricating machines and represent AMI throughout the Midwest United States and other areas as needed.

Automated Machinery, Inc. (AMI), founded in 1982, is the leading independent provider of service, parts, retrofits and maintenance programs for turret punch presses, press brakes and other CNC sheet metal forming equipment. AMI's experienced service team provides expert technical support and services, as well as a comprehensive inventory of new, discontinued and reconditioned replacement parts for a variety of turret punch press and press brake brands and other CNC fabricating machines.
